

Adopted: April 9, 2019

## **Bloodborne Pathogen**

### **Purpose**

Bonneville Academy is dedicated to the prevention of bloodborne infections by eliminating or minimizing occupational exposure to human blood, human blood products, and other potentially infectious materials (OPIM).

### **Provisions**

In order to maintain the most current and recommended procedures to prevent exposure to bloodborne pathogens Bonneville Academy will follow guidelines of the Occupational Health and Safety Administration as outlined in OSHA Bloodborne Pathogen Standard (29 CFR 1910.1030).
